

## FEE SCHEDULE

| STORAGE FEES                                 | Standard      | Potentially Infectious |
|--|---------------|------------------------|
| <b>Sperm, Egg (Oocyte) or Ovarian Tissue</b> |               |                        |
| Quarterly                                    | <b>\$75</b>   | <b>\$113</b>           |
| 1 Year                                       | <b>\$275</b>  | <b>\$413</b>           |
| 2 Years                                      | <b>\$490</b>  | <b>\$735</b>           |
| 3 Years                                      | <b>\$705</b>  | <b>\$1058</b>          |
| 5 Years                                      | <b>\$1050</b> | <b>\$1575</b>          |
| 10 Years                                     | <b>\$1905</b> | <b>\$2858</b>          |

ReproTech, Ltd. does not charge a storage fee for semen or oocytes when a client is storing embryos.

### Embryo

|           |               |               |
|-----------|---------------|---------------|
| Quarterly | <b>\$106</b>  | <b>\$159</b>  |
| 1 Year    | <b>\$400</b>  | <b>\$600</b>  |
| 2 Years   | <b>\$700</b>  | <b>\$1050</b> |
| 3 Years   | <b>\$1000</b> | <b>\$1500</b> |
| 5 Years   | <b>\$1400</b> | <b>\$2100</b> |
| 10 Years  | <b>\$2645</b> | <b>\$3968</b> |

Call to obtain fees for additional storage periods.  
Online payments available at [www.storagefees.com](http://www.storagefees.com).

### ADMINISTRATIVE

|  |                  |
|--|------------------|
| Account Setup Fee                                    | <b>No Charge</b> |
| Handling Fee   | <b>No Charge</b> |
| Late Fee (applied to accounts with overdue balances) | <b>\$10</b>      |

### SHIPPING

**Local Medical Courier\*** **\$75–125**

\*Available within metro area of each RTL Office.

### Domestic Overnight Air Courier

Per Tank\*\* **\$215**

\*\*Two tanks recommended if specimens packaged in multiple storage containers.

### Multiple Clinic Transfers

Domestic Only **\$650**

### Optional Shipping Insurance provided through IMA\*\*\*

\$15,000 to \$25,000 coverage **\$19.50–32.50**

\*\*\*Call for details regarding coverage for specimen loss.

Shipping Fee may be reduced if clinic arranges for group shipments from clinic to RTL.

**REPROTECH**  
L I M I T E D

“The primary fear of my patients is that embryos could get mixed-up or that a problem may occur during shipping. I have full confidence in ReproTech to keep paperwork organized and accurate, keep embryos well categorized and keep the embryos completely safe during transport. That gives my patients confidence as well.”

– Randle Corfman, M.D., Ph.D.

“We store embryos for one year and then transfer everything to ReproTech. This process gives me great peace of mind because ReproTech is now keeping track of patients’ records and is responsible for the final disposition of the embryos. And they do a terrific job at it, freeing me of the emotional, ethical and potential legal concerns.”

– Nel Roberts, Lab Supervisor

“Since ReproTech works directly with our clients and their longterm storage needs, it’s important that they represent themselves extremely well. ReproTech has proven they have a higher standard in this than we would ask of ourselves. They have shown me through their organizational practices that they can be trusted. They have an established protocol for semen or embryo transfer that never varies. The same is true for documentation. Everything is tightly controlled. Deliveries are scheduled well in advance and always on time.

ReproTech has done an excellent job for us and I strongly recommend anyone needing longterm storage to trust the process to ReproTech.”

– Klaus E. Wiemer, Ph.D.

**THE  
CRYOSTORAGE  
EXPERTS  
YOU CAN  
TRUST**

integrity

experience

reliability

understanding

ReproTech is the only company in the nation that focuses exclusively on the long-term storage of reproductive tissues. We don't sell donor sperm. We don't provide IVF services. We store reproductive tissue.

That makes us unique in the Reproductive Medicine industry. While most organizations try to be all things to all patients, we've successfully carved out a niche as the nationwide expert in long-term storage. Along the way, hundreds of IVF centers have transferred their clients' storage needs to ReproTech — recognizing that our storage protocols and proprietary systems are the safest place on earth to entrust their patient's future.

In the ever-changing landscape of human reproductive tissue storage, ReproTech has emerged as the one-stop resource specializing in effective solutions to the challenges faced in Reproductive Medicine.

ReproTech's experienced staff provides expert consultation services for long-term storage of reproductive tissues and donor program management, to assist in compliance with regulatory agencies.

In many instances, IVF centers find the complexities and responsibilities involved in long-term cryopreservation warrant third party involvement. ReproTech is uniquely equipped to meet the patients' long-term storage needs, thereby releasing the clinician and lab staff of the commitment. RTL assumes responsibility for transfer and storage of the cryopreserved tissue, as well as all future correspondence and final disposition.

## STORAGE MANAGEMENT FOR IVF CENTERS

Many IVF clinics agree to store their patients' specimens for a short time (one year or less), thereby reducing the need to buy additional storage tanks and protect themselves from the liability for specimens of non-active patients. At the end of that time, patients are required to decide whether to continue with long-term storage, use their gametes and/or embryos, donate or dispose of them. Specimens from patients choosing to continue storage are transferred to RTL.

## TESTING REQUIREMENTS

RTL accepts specimens from individuals who have tested non-reactive for Anti-HIV (1&2) and charges standard storage rates. Specimens will be accepted without this testing, however those specimens will be stored at Potentially Infectious rates and segregated accordingly.

## POTENTIALLY INFECTIOUS SPECIMEN STORAGE

RTL provides storage services for patients who have tested positive for sexually transmitted diseases such as HIV, Hepatitis B, Hepatitis C, HTLV 1&2, syphilis or other communicable diseases. We provide separate shipping and storage tanks that are used exclusively for Potentially Infectious Specimens.

## TRANSFER OF SPECIMENS

Specimens are transferred in validated nitrogen shipping tanks which are placed within customized locking shipping containers for transport via overnight courier. Due to the valuable nature of the specimens and for added safety, RTL recommends the use of two transfer shippers to split the shipment. RTL handles the arrangements for the transfer and prepares the necessary shipping paperwork. Documentation verifying transfer of specimens follows each shipment.

We use temperature exposure indicators, which monitor the vapor shipper environment throughout shipping to ensure the successful transfer of specimens. RTL recommends the purchase of shipping insurance which is available through IMA, as the policy coverage will pay expenses associated with a replacement procedure.

## WITHDRAWING SPECIMENS

Patients may have their specimens withdrawn at any time with the request of a licensed physician or designee. Before release of specimens from RTL to the patient's clinic, industry standards/regulations require the patient complete the following serology/virology testing: HBsAg and Anti-HCV, in addition to Anti-HIV 1&2 and/or a Special Circumstance Release.

Specimens are then transported to the requesting physician with a nominal charge. Optional shipping insurance is available.

## DISPOSITION OPTIONS FOR EMBRYOS

Three options are available for the final disposition of embryos: anonymous or directed donation to another recipient, donation for research (stem cell, embryo development, etc.) or patients may choose to discard them. Donation options depend on specimen quality and/or donor screening/testing results as well as the ability of research facilities to accept embryos. RTL requires documentation of final disposition, including notarized signatures of our patients.

## SAFETY

RTL is also a leader in developing industry standard storage protocols and documentation. As a long-term storage specialist, we've gone well beyond the industry standards in creating safeguards to ensure the safety and accuracy of the tissues entrusted to us. RTL maintains documentation of effective specimen transfer using quality control measures. AATB and NY State inspections have confirmed the effectiveness of RTL's procedures for specimen transfer and storage.

RTL uses state of the art storage tanks, which are replenished regularly with liquid nitrogen to maintain temperatures. Each tank is monitored 24/7 with sophisticated systems capable of detecting temperature variations as slight as .01 degrees Celsius. Our offices are strategically located around the United States in areas that are lower in risk for natural disasters, while providing clients convenient access to storage. RTL's Florida facility is the only storage facility in the country to install a Category 5 Hurricane shelter for the safe keeping of client specimens. This shelter houses the cryostorage tanks and is designed to withstand the strongest storms seen in this country and more.

## CREDENTIALS

RTL has been at the forefront of the reproductive cryobanking industry since our inception. We're proud to have played a leadership role in the development and furtherance of an industry that brings hope to so many.

- Established in 1990 as a long term storage facility
- Inspected and Licensed by the New York State Department of Health
- Inspected and Accredited by the American Association of Tissue Banks (AATB)
- Licensed by the California State Department of Health
- Member of the American Society of Reproductive Medicine
- Facilities located in Florida, Minnesota, Nevada and Texas, staffed by experienced personnel

## MISSION STATEMENT

ReproTech, Ltd. (RTL) is committed to maintain the highest level of expertise and competency in the field of Reproductive Medicine. Our quality services ensure safe and effective shipment and long term storage of cryopreserved reproductive tissues. We are dedicated to assist our clinical partners facing regulatory requirements in the areas of tissue storage, donor gametes and donor embryos.

*Each of our four regional storage facilities is staffed by experienced personnel.*
